Introduction

Thank you for purchasing the W51CA.

Before using it for the first time, be sure to read the W51CA Basic Manual (this PDF manual) so as to know how to use it correctly. After you finish reading this manual, store it and the printed materials that come with the phone in a safe place for future reference.

Printed Manuals for the W51CA (Japanese)

The W51CA comes with a Basic Manual and an Instruction Manual.

For information about basic operation

Cellphone Etiquette

Mind your manners!

A cellphone always emits weak radio waves while it is turned on. Enjoy operation of your cellphone without forgetting to be considerate of those around you.

Some locations do not allow the use of cellphones.

- Using a cellphone while driving is dangerous and prohibited by the Traffic Control Law.
- Using a cellphone inside of an aircraft is prohibited by law. Be sure to turn off your cellphone before takeoff.

Watch out where you use your cellphone, and keep your voice down.

- Do not make calls at cinemas, theaters, museums, libraries, or other similar locations. Turn off the cellphone or use Manner Mode to ensure that the ring tone does not disturb others.
- When in public, move to a location where you will not be blocking traffic.
- On the Shinkansen, in a hotel lobby, or in other similar locations, move to a location where you will not disturb others.
- Take care to avoid talking on the phone in a loud voice.
- Before taking the picture of others, be sure to obtain permissions first.

Cellphone radio waves may interfere with electrical medical equipment.

- On a train or in other crowded locations, there is always the possibility that someone nearby may be wearing a pacemaker. Turn off your cellphone when you are in a crowded area.
- Follow the rules of hospitals and other medical facilities prohibiting the use or possession of cellphones.

▶ Page 35

Easy Voice Memo

If you cannot answer a call, Easy Voice Memo plays an answering message and records the caller's message.

While the standby screen is displayed, hold down **メモ/留守** for about one second.

▶ Page 36

Checking Power, Signal Strength, and Battery Level

Normally leave the phone turned on.

The phone needs to be turned on to make and receive calls.

Hold down **電源** for at least 1.5 seconds to turn on W51CA. After a while, W51CA turns on with tone and the standby screen appears.

▶ Page 14

You cannot talk on the phone if it is unable to receive a signal.

Signal strength is low in some areas, even if they are within the service area.

信号 indicates the current signal strength. ▶ Page 14

Keep an eye on the battery level.

The phone may not function properly if battery power is low.

電池 indicates the current battery level. ▶ Page 14

Never use your cellphone while driving!

Holding a cellphone in your hand, talking on a cellphone, or looking at a cellphone display to send mail or to perform any other operation while driving is prohibited by Japanese law.
(Revised Traffic Control Law, effective November 1, 2004)

× Reading mail or looking at the display.

× Holding a cellphone in your hand to talk.

Turn off your cellphone or use Drive Mode while driving.

Drive Mode

In Drive Mode, the phone will play the message “ただいま車を運転しています。…” (I am driving right now...), and then ask the caller to leave a message using Easy Voice Memo.

While the standby screen is displayed, press マナー, and then press 1 (ON). Next, press 2 (Drive Mode) to enter Drive Mode.

Beware of spam and One-ring Calls!

How to Combat Spam

You can set up mail filters to block specific mail or mail identified as “未承諾広告※” (unsolicited advertisement), which often includes spam.

Your cellphone has the following filters to block spam.

- ・ 未承諾広告フィルター
(unsolicited advertisement filter)
- ・ アドレスフィルター (address filters)
 - － 指定拒否設定 (blocks specific mail)
 - － 指定受信設定 (receives specific mail)

Page 56

Beware of One-ring Calls!

A “One-ring Call” (wan-giri in Japanese) rings your phone only once, in an attempt to make you call back to a service that automatically bills you very high charges.

If W51CA received a “One-ring Call”, the  icon appears at the head of an incoming record.

Disaster Message Board Service

Disaster Message Board

The Disaster Message Board lets you use EZweb to register information about your well-being in case of a major disaster. The information you register can be accessed from anywhere in Japan over EZweb or the Internet.

Registering the safety information

- ◆ When a major disaster strikes, you can use your au cellphone to access the “災害用伝言板” (Disaster Message Board) on EZweb and register your current condition, comments, and other information about your well-being.
- ◆ After you register information, it can be sent by mail to family, friends, and other individuals you have registered as a recipient of your Disaster Message Board information.

Checking the safety information

- ◆ Disaster Message Board information can be accessed by inputting the phone number of an individual over EZweb or the Internet.*

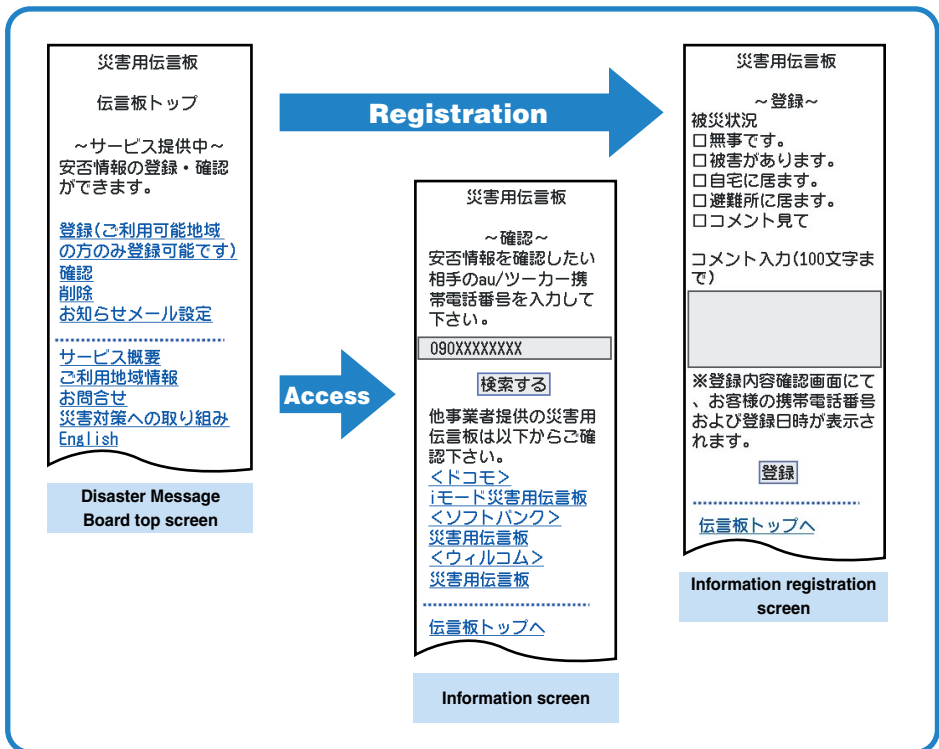

※ Disaster Message Board information can be accessed from another type of cellphone, PHS, or PC at <http://dengon.ezweb.ne.jp/>.

Access method

 >>> Top Menu >>> 災害用伝言板
(Disaster Message Board)

<http://dengon.ezweb.ne.jp/>

※ Registration contents are retained for up to 72 hours.

※ You can register up to 10 entries per phone number. Registering a new entry while there are already 10 registered entries, automatically overwrites the oldest entry.

※ You can view a Disaster Message Board demonstration at:

[📠](#) → Top Menu → auお客さまサポート → 調べる → 災害用伝言板(デモ版)
(au Customer Support) (Information) (Disaster Message Board (Demo))

※ To view the Disaster Message Board in English, select the “English” option on the Disaster Message Board top screen.

Info

- The microSD™ memory card is not included.
- An AC adaptor is not included. It is up to you to purchase a common AC adaptor 01 (option).

Names of Parts

Front

※1: During a call, do not cover the microphone with your hands or your chin. The microphone (placed on W51CA shown above) allows you to talk over your W51CA in Viewfinder position.

※2: Take care to avoid covering the built-in antenna with your hand when using the phone, using EZweb, and when accessing GPS information.

※3: Take care not to touch the exposed area of built-in antenna.

Back

Side

※ Extend the TV antenna when you watch EZ Television (1Seg).

Using the TV antenna (as extended when using EZ•FM, EZweb or making a call) does not affect call quality.

Charging the Battery Pack

The battery pack that comes with the phone is not fully charged when you purchase it. Be sure to charge the battery pack before using the W51CA for the first time. Charging takes about 140 minutes.

You should recharge the battery pack whenever the battery level icon shows  or .

Check the shape of the connectors to ensure they are aligned correctly when you connect them.

CAUTION

- ◎ You must purchase a common AC adaptor 01 (option) for charging. Note that the configuration of the AC adaptor may be different from that shown in the illustration above.
- ◎ Pull out the connector of the common AC adaptor 01 (option) straight so as to be parallel to the W51CA or the desktop holder connector terminal when you connect them.

1 Connect the common AC adaptor 01 (option) to the desktop holder.

Check the shape of the connectors to ensure they are aligned correctly before you connect.

Trying to force a connection may damage the connectors.

2 Insert the W51CA into the desktop holder.

3 Fold out the power plug of the common AC adaptor 01 (option), and then plug it into a 100V AC power outlet.

This will cause the W51CA LED indicator to light red, and  (charging battery icon) to display.

When charging is completed, the battery level icon will show  and the LED indicator will go out.

When charging the battery with your W51CA in Viewfinder position, check the charging battery icon shown on the screen. If you set "Func in Charge" to "MEDIA STAND," the screen keeps illuminating with the normal brightness.

To remove the W51CA from the desktop holder, holding the holder by hand and remove W51CA.

※ You can connect the common AC adaptor 01 (option) to the W51CA directly to charge the battery pack.

Check the shape of the connector ends to ensure they are aligned correctly (shown above) when connecting.

※ Using Extension Mode

Using the Extension Mode, W51CA automatically shuts down the radio wave after issuing the Low Battery Alert. This is quite a useful function that you can still check outgoing/incoming records, content of e-mail, address book, Schedule and so on when necessary. In this case, you can only use the functions which needs no radio wave.

One-ring Calls

What is a “One-ring Call”?

A “One-ring Call” is an incoming call that rings your phone only once, which aims it to be stored in your incoming records. If you redial the number shown in your incoming records, often you are connected to a dating service or some other service that may bill you very high charges. Always keep in mind that it is a good idea to avoid calling back unfamiliar numbers.

Your W51CA supports two types of mail:
e-mail and C-mail.

Using E-mail

To use e-mail, you need to subscribe to an EZweb service. If you did not subscribe when you purchased your phone, contact your nearest au shop or the au Customer Service Center.

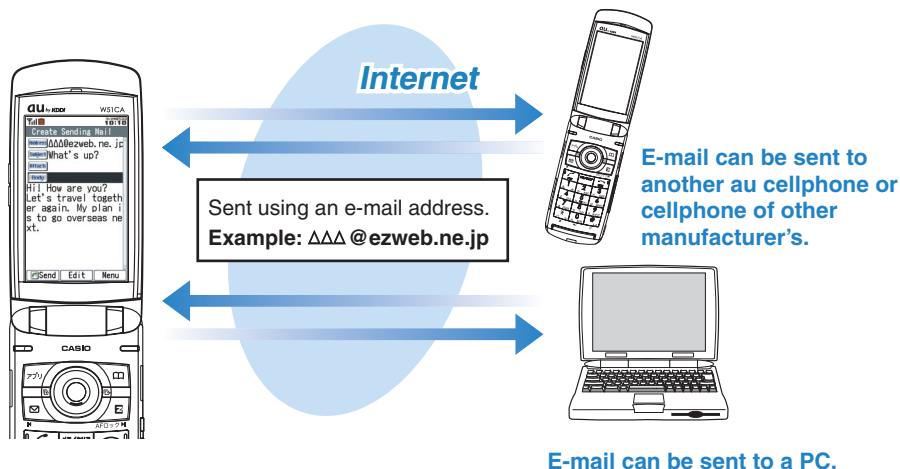

In addition to an EZweb subscription, you also need to perform an initialization procedure before you can use e-mail. If you have not performed initialization yet, refer to “Initializing E-mail and EZweb” (page 24).

E-mail makes you possible to exchange mails with a PC and with another cellphone that supports e-mail function.

You can send mail messages that contain up to 5,000 double-byte characters (10,000 single-byte characters), and you can attach photos and movies to e-mail messages.

Page 51

2

Send images by e-mail!

Within 500KB*, you can send a photo or a movie (shot or recorded with Mail Mode) as an e-mail attachment.

※ Certain signal conditions may cause e-mail sending and receiving to take longer than normal.

Tips for Better Photos

Shooting with W51CA open

Do not cover the lens or optical sensor with your hands. Hold the camera securely with both hands. Use your thumb to press  (Shutter) to release the shutter.

Shooting in the Viewfinder position

Do not cover the lens or optical sensor with your hands. Hold the camera securely with both hands. Use the index finger of your right hand to press  to release the shutter.

Tips for Avoiding Hand Movement

- Remain steady by keeping your arms lightly against your sides and standing with your feet about shoulder width apart. Having your arms away from your side or extended in front of you can cause blurred images.
- When you press the shutter button, remain still until your shutter tone finishes sounding. This is especially important when shooting where lighting is dim.
- A self-timer is also provided for shooting photos. With the self-timer, you do not need to press the shutter button to shoot a photo, so there is less chance of a blurred image caused by accidental movement of the phone.

Auto focus

W51CA has built-in auto focus function. You can shot photos with the subject properly focused simply by pressing the shutter key.

Safety Navi Features

EZweb subscription required

You can check the location of another au phone and receive a notification message when you enter or leave a specific area during a predefined time period by your operation of W51CA.

1

“いつでも位置確認” (Auto Position Search)

Example: When the mother sent a mail to her child

Features

- You must register each other's information in both cellphones beforehand. When mother searches for child's position, W51CA automatically shows the child's current position without operations from the child.

Notice: The monthly fee is charged separately.

2

“エリア通知” (Area Message)

Example: When the mother checks the area her child is in

Features

- A message is automatically sent from the child's au cellphone to the mother's, when the child is getting to (or staying in) the pre-specified area in the pre-specified period of time. Notification is also available when the child is getting (or being) out of the pre-specified area.

3

“位置確認メール” (Position Search Mail)

Example: When the mother sent a mail to her child

Features

- By sending e-mail from mother to child, she can confirm the child's position.
- When child's number is saved in Address Book, mother can confirm the child's position easily without membership registration.**

Notice: When confirming, this service requires child's operations.

Info

- ◎ Safety Navi services are available only among the cellphones supporting these feature.
- ◎ Before you can use Safety Navi, the phone numbers of the cellphones must be recorded in the address books of both of the cellphones.
- ◎ Before you can use Safety Navi, you need to agree the terms of use that appears the first time you start it up and you must register a password.
※ Agreement of the terms of use is required for both sides.
- ◎ The wrong location may be displayed in areas where GPS reception is poor, underground, inside of a building, or in areas surrounded by buildings.
- ◎ Area Message may not be able to send alerts properly in cases where correct location information cannot be obtained.
- ◎ When the other party is out of range, set to “reject,” no application, operating, or using a cellphone not supporting this service, you cannot check the location.
- ◎ If you are subscribed with “料金安心サービスご利用停止コース” (which suspends service when a preset amount is reached), this service is not available if you exceed your limit amount.
- ◎ The screen is an example, and may differ from the actual display.
- ◎ Safety Navi features cannot be used while C-mail is disabled or when EZ apps Restrict is selected.
- ◎ Free calling time provided by your service plans can be applied to EZ apps transmission charges. However, Family C-mail Service or Packet Communication Discount Service does not apply to EZ apps transmission charges.
- ◎ Location information acquisition and map display are subject to information charges in addition to packet communication charges.

Next, continue from step 3 of the procedure under “Recording Movies from TV Programs” (page 93).

Terrestrial Digital TV Broadcasting

Terrestrial digital TV broadcasting (provides digitalized contents of the existing analog TV broadcasting) was launched in Japan in December 2003.

Terrestrial digital TV broadcasting designed for cellphones or other portable terminals is called “1Seg” service (not includes terrestrial digital TV broadcasting service for household TV). EZ Television (1Seg) allows you to enjoy the “1Seg” service. You can receive the terrestrial digital TV broadcasts through a UHF antenna.

■ Before using a TV antenna

When you use EZ Television (1Seg), fully extend the TV antenna to get a signal.

※ To avoid damage, always extend it straight and check the direction of the antenna tip so that it snaps into place properly.

- You need to perform an initialization procedure before you can use EZ Television (1Seg). If you have not performed initialization yet, refer to “Initializing E-mail and EZweb” (page 24).
- No packet communication or other communication fees are charged for watching programs (EZ Television (1Seg) offer). However, you will be charged for packet communication if you download an electronic program guide (EPG) or use the song title search function (paid service).
- No packet communication or other communication fees are charged for watching data broadcasting programs. However, you will be charged for packet communication if you use the interactive service provided by data broadcasting programs or access to the information site on EZweb.
- EZ Television (1Seg) is unavailable after canceling your W51CA service.
- You are unable to start EZ Television (1Seg) when remaining battery level indicated as or .
- When remaining battery level shows during EZ Television (1Seg) is active, a message (indicating the battery will be soon discharged) appears, and automatically stop EZ Television (1Seg).
- The continuous broadcasting time provided by W51CA is approximately 5 hours and 30 minutes.* However, it depends on the factors such as frequent operations performed during data broadcasting programs.
 - ※ The time mentioned above is measured under the following conditions:
 - Display: Full-screen display Earphone volume level: 10
 - Brightness level: 3 (“明るさ 3” in “画質調整設定” (Picture quality settings))
 - Caption: OFF (“字幕OFF” in “字幕設定”(Caption settings))
- The W51CA may fail to receive radio signals properly depending on the location or radio wave receiving conditions. In this case, the quality of the picture or the sound may be lower than usual or not available.
- The display layout and contents are examples. These are subject to change.
- “1Seg” service (terrestrial digital TV broadcasting designed for cellphones or other portable terminals) has been launched in the Kanto (Tokyo), Chukyo (Nagoya), Kinki (Osaka), and other areas on April 1, 2006. For details on “1Seg” service, please visit the website below.

Other Functions

Security Setup Features

With Security Setup, you can make a phone call to preregistered numbers or use high-volume buzzer just holding down  for about one second.

Safety Buzzer

You can use W51CA as high-volume emergency buzzer by holding down  for at least one second while the standby screen is displayed.

■ To turn on Safety Buzzer

While the standby screen is displayed, press     , input the lock No., and then press  (OK).

■ To stop Safety Buzzer

To stop Safety Buzzer, input the lock No., and then press  (OK).

※ You cannot turn off W51CA or perform any other operation while the Safety Buzzer is sounding. The Safety Buzzer will continue to sound until you input the lock No. or the battery fully discharges.

Hot Dial

With Hot Dial, holding down  for about one second will dial a preset phone number.

■ To turn on Hot Dial

While the standby screen is displayed, press     , input the lock No., and then press  (OK).

Next, input the phone number you want to preset, and then press  (Reg).

- © Even when Manner Mode is on, Safety Buzzer sounds.

Extension Mode

Using the Extension Mode, W51CA automatically shuts down the radio wave after issuing the Low Battery Alert. This is quite a useful function that you can still check outgoing/incoming records, content of e-mail, address book, Schedule and so on when necessary. In this case, you can only use the functions which needs no radio wave.

To turn on Extension Mode

While the standby screen is displayed, press     .

Display example when you switch to Extension Mode

In addition to the functions covered in this Basic Manual, your W51CA also has the following features.

Global Expert

W51CA supports Global Expert based on au IC-Card.

Global Expert is an international roaming service for the customers to use the phone replacing its au IC-Card with GSM cellphone for overseas use. No special application procedure or daily/monthly fee are needed, and the call charge is added up to domestic call, so the pay procedure is simple.

au Music

You can use au Music Player to enjoy a Chaku-Uta-Full® or your favorite CD tracks. Also, you can download a Chaku-Uta-Full® or purchase CD tracks by accessing "EZ Music!"

Barcode Reader & Maker

You can use the camera to read QR codes and barcodes. Also, you can create your own barcodes directly from your address book entries.

au My Page

You can upload and backup various data in your W51CA (in Address Book, E-mail, Data Folder) to au My Page on server to manage/check them.

Infrared Communication

You can exchange the data saved in your address book, Schedule, or Data Folder between au cellphones supporting infrared communication.

EZ Apps (BREW®)

Enjoy downloaded games and other software.

Macro Mode (Photo and Movie)

Pressing  allows you to take close-up photos of food, flowers, and other subjects (closest focusing distance: 10 cm).

Serial Shot (Photo)

You can shoot up to nine consecutive images and store all of them or only selected images in memory.

Post Recording/Telop (Movie)

After recording a movie, you can add audio or text. You can select from among 24 basic colors or from a palette of 169 colors for the text and background.

EZ News Flash

You can check latest news report on your standby screen. With this total new "information delivery service," you can select news flash telop or news flash window to browse various news information.

If you lose your W51CA

Turning on Remote Auto Lock makes it possible for you to set Auto Lock and FeliCa Lock on from a remote location. This lock function keeps others from using your W51CA.

■ Configuring Remote Auto Lock Settings

You can set Auto Lock and FeliCa Lock on by making calls several times from the registered phone number to your W51CA within the specified period of time.

- While the standby screen is displayed, press , input the lock No., and then press (OK).

- Press (Caller ID List).

- Use to select a registration number, press (Edit), input the phone number, and then press (Reg).

You can also press (Menu) before inputting a phone number, and select the number from the address book, outgoing records, or incoming records, or you can specify a pay phone. You can register up to three different phone numbers.

Press twice and advance to the next step.

4 Press **1** (ON/OFF Setup), and then press **1** (ON).

5 Press **2** (Specified Time), input the period you want to specify, and then press **OK** (OK).

You can set the time period (the time intervals from the first call to the last call you should make to activate Remote Auto Lock).

You can set the time period between 1 to 10 minutes.

6 Press **3** (Num of Incoming), input the number of calls you want to specify, and then press **OK** (OK).

You can set how many times you should repeat making a call to activate Remote Auto Lock.

You can set it from 3 to 10 calls.

■ Setting Auto Lock and FeliCa Lock on

1 Make a call to your W51CA from the registered phone number within the period of time which has been specified in “Configuring Remote Auto Lock Settings” (page 120).

After repeating a call (3 to 10 calls you have specified), Remote Auto Lock turns active, and you hear an announcement letting you know Auto Lock and FeliCa Lock has been set.

After Remote Auto Lock turns active, your W51CA is automatically turned off, and turned on again.

⚠ CAUTION

- Remote Auto Lock cannot be activated while your W51CA is turned off or outside of the service area.
- When you purchase the W51CA, its initial value in “Erase Data” setting is “Not Erase,” and its initial value in “Rel Phone Lock” setting is “Valid.”
